EDUCATION

Universidad La Salle, Mexico City, Mexico

Bachelor of Engineering in Cybernetics and Computer Systems, May 2021

Massachusetts Institute of Technology (MITx) — Online

MicroMasters Program in Statistics and Data Science (in progress)

PROFESSIONAL EXPERIENCE

Pinterest, Mexico City, Mexico

Analytics Engineer

Jun 2025 – Present

- Built and maintained scalable data pipelines and source-of-truth datasets to support analytics across the organization.
- Developed dashboards and reporting solutions to enable data-driven decision-making for stakeholders.
- Automated workflows with Airflow, Python, and SQL, improving data reliability and reducing manual effort.
- Partnered with cross-functional teams to design, validate, and deliver trusted data products.

DiDi, Mexico City, Mexico

Data Science Analyst

Jan 2024 – Jun 2025

- Designed and deployed scalable data models and operational dashboards, streamlining performance tracking for strategy teams.
- Built and deployed Python-based forecasting models, increasing demand prediction accuracy by 15%.
- Partnered with engineering and product teams to define KPIs and establish robust analytics frameworks.
- Led onboarding and mentoring initiatives for junior analysts, improving team productivity.

Stori, Mexico City, Mexico

Business Analyst

Sep 2022 – Jul 2023

- Developed automated ETL pipelines with DBT and Apache Airflow, accelerating experimentation insights and performance reporting.
- Created executive-facing dashboards using AWS Quicksight and Redshift to support business decision-making.
- Applied Python for data cleaning, forecasting, and time-series analysis, identifying revenue growth opportunities.
- Reduced manual reporting effort by 40% by streamlining data operations.

Walmart, Mexico City, Mexico

Business Intelligence Analyst

Apr 2022 – Sep 2022

- Created a Python-based sales forecasting model for major promotional events, reaching 90% forecast accuracy.
- Designed and maintained automated data pipelines using LookerML to support marketing analytics.
- Implemented anomaly detection processes, cutting manual QA workload by over half.

Intel, Guadalajara, Mexico

Business Intelligence Analyst

Jun 2021 – Apr 2022

- Developed centralized dashboards consolidating regional data on sales, inventory, and logistics.
- Delivered Python-based visualizations and reports to senior stakeholders, enhancing decision-making speed.
- Standardized KPIs across business units to ensure consistent reporting.

Dr Envío, Remote
Bot Developer (Contractor)
Mar 2021 – Dec 2021

- Engineered a web-scraping bot pipeline to automate collection and normalization of e-commerce product data.
- Increased data collection throughput by 500% while minimizing human effort.

Nielsen, Mexico City, Mexico
Data Science Intern
Aug 2020 – May 2021

- Developed ETL workflows for aggregating TV and digital media performance metrics.
- Improved reporting accuracy and reduced delivery time for weekly dashboards.

TECHNICAL SKILLS

Languages: Python, SQL
Data Engineering: Apache Airflow, DBT, ETL Pipelines
Cloud Platforms: AWS (Redshift, Quicksight), Google Cloud
BI Tools: Tableau, Looker, Matplotlib
Machine Learning: Scikit-learn, XGBoost, Predictive Modeling, Generative AI
Other Tools: Git, Docker, REST APIs, CI/CD

CERTIFICATIONS

- Data Engineer with Python – DataCamp
- Data Scientist Career Path – DataCamp
- SQL Expert – HackerRank
- Data Analysis with Google – Coursera
- Project Management – Coursera (Google)
- Data Science for Business – DataCamp

LANGUAGES

Spanish (Native), English (Fluent – C1)

LEADERSHIP & VOLUNTEER EXPERIENCE

Walmart Volunteer, Mexico

- Led water systems renovation efforts in Mazahua (2023) and participated in environmental reforestation in Tepetzotlán (2022).

Math Tutor, Universidad La Salle

- Supported high school students preparing for university entrance exams, improving test performance by 20%.
